About

Hello, have you been listen about OAUTH2 ? And do you know what is a proxy ?

In this simple, but teachable project, we can reach the main concepts of them.

How ?

Using a open source project as a auth module, to generate a valid Json Web Token and throw forward to a proxy.

Keycloak

An excelent free auth module, wrote in Java, as we can see on its web page. keycloak-page.

Its over APACHE2.0 license. Thus, in case you wanna try it, read the license doc.

Ory Oathkeeper

"Ory is the largest open source community in the world for cloud software application security". ory-page.

We gonna use one of its products, the incredible proxy wrote in golang. ❤️
